Trust QEC for your critical preserving

QEC was privileged to exhibit at the 34th annual International Conference on Soils, Sediments, Water, and Energy in Amherst, MA.. It was an excellent opportunity to discuss the importance of properly preserved containers when sampling for soil and water analyses.

QEC has a proven reputation as a reliable supplier of pre-preserved containers, and is trusted by labs around the world to meet their demanding preserving needs, including:

- PFAS Testing
- UCMR4 Protocols
- Method 5035 Sampling

QEC can customize a preserving regimen to fit your lab's and your project's needs. QEC Custom-Preserved™ containers are OSHA HCS 2012 and DOT compliant, and ready to use.

To learn how QEC's worry-free preserved containers will protect your sample integrity, please contact your QEC representative or our **Customer Service Team**.

Protecting your sample integrity™...
Every container. Every time....
